Risk Assessments, Risk Management, Auditing, and Evaluation

University of Colorado Denver HIPPA Policy

The most secure SEHD data are subject to the UCD Audiiting HIPPA policy. The policy states

> UCD shall assess potential risks and vulnerabilities by reviewing information system activity, and developing, implementing, and maintaining appropriate administrative, physical, and technical security measures in order to detect and minimize security violations involving ePHI. These protective measures give UCD the ability to identify unauthorized data access activities, assess security safeguards, and respond to potential weaknesses.
